

K&M KÖNIG & MEYER GERMANY

THE FLEXIBLE 18940

In 1982, K&M began producing keyboard stands. The first stand was a chrome-plated, non-adjustable stand made from U-shaped steel. In 1985, K&M introduced the first X-style keyboard stand – a scissors-shaped design that was height-adjustable and foldable for easy transport and storage. The X-stand also featured a durable powder-coated finish. K&M continued to perfect the X-stand's height-adjustment mechanism. Their research and development efforts were showcased in 1993 with the introduction of the 18940 keyboard stand. Its patented quick-release, push-button height-adjustment

STANDS *for music*

KEYBOARD STANDS

mechanism set new standards for ease-of-use and comfort. Its sturdy brother, »Rick« (model 18990), with its massive double cross support design, was introduced in 1995. Together, the 18940 and 18990 showcase the engineering and manufacturing excellence that sets every K&M product apart from other stand makers.
