Features

- UI redesign according to the current corporate design with a fresh and modern look
- Harmonized parameter labels with TX sync setting labels known from WSM
- Adjusted WSM import functionality to also allow for importing new HTML format

Resolved Issues

- Introduced frequency validation for transmitters

Previous Releases

Sennheiser Transmitter Manager 4.0

- No licensing required
- New supported transmitters (SK 6000, SKM 6000, SK 6212)
- Frequency set files can be loaded from the hard disk into the frequency editor
- WSM report files can be loaded from the hard disk into the frequency editor
- Frequency ranges of SK 5212-II and SKM 5200-II are now displayed correctly
- Attenuation values of SKM 9000 are now displayed correctly
