

guidePORT: flexible, automated visitor information.

The benefits at a glance:

- Useable with or without a tour guide
- Flexible applications
- Simple, intuitive operation
- Reduces acoustic interference –
for optimum sound quality
- Over 30 languages and different
information levels can be used
- Hearing aid compatible – for optimum barrier
freedom

548719 01/12 Printed in Germany. Sennheiser is a registered trademark of Sennheiser electronic GmbH & Co. KG., www.sennheiser.com

A photograph of an industrial interior, possibly a factory or power plant. In the foreground, a group of about six workers wearing orange safety vests and hard hats are looking towards the right. In the background, a large, dark, cylindrical industrial component is visible. A large, glowing blue, abstract data visualization, resembling a complex network or map, is superimposed over the scene, appearing to emanate from the industrial equipment. The overall lighting is dark, with the blue glow providing a focal point.

Sennheiser
tour-guide systems.
Key data at a glance.

 **SENNHEISER**

tourguide 2020-D: **versatile, comfortable audio transmission.**

The benefits at a glance:

- Ready to go
- Intuitive operating concept
- Extremely robust
- For up to six visitor groups simultaneously – without interference
- Can be used for simultaneous interpretation in up to eight languages (stationary with the SR 2020-D rack transmitter)
- Hearing aid compatible – for optimum barrier freedom
- Practical charging technology

tourguide EK 1039: **maximum sound quality in any environment.**

The benefits at a glance:

- Optimum speech intelligibility
- Simple operation
- Extremely robust
- For up to 32 visitor groups simultaneously – without interference
- Can be integrated into an interpreting system
- Hearing aid compatible – for optimum barrier freedom
