

CUSTOMER SUCCESS STORY

NorthLight School

NorthLight School provides engaging education with Sennheiser's TeamConnect Ceiling 2

“The ceiling microphone from Sennheiser changed the way we conduct meetings and presentations. The high-quality audio and enhanced coverage exceeded our expectations. The TruVoicelift functionality as well as exclusion and priority zone features have also been really helpful and beneficial to our users. All in all, it was a positive experience working with Sennheiser and AV Media.”

Lim Teck Wah, IT Executive, NorthLight School

Challenge

With an existing conference room that was fast becoming too small for its growing demands, NorthLight School wanted to build a larger conference room with high-end capabilities to better serve its staff and students. Besides being limited by the size of the original room, another challenge they faced was the audio set-up. Most of the time, 20 people had to share 2 handheld microphones, which was unproductive and a huge hygiene risk.

Solution

Sennheiser's TeamConnect Ceiling 2 was installed in NorthLight's new conference room to provide robust coverage and enhanced speech intelligibility. With the new audio installation, staff and students can now enjoy a seamless experience when attending meetings, discussions or giving presentations.
