

## CUSTOMER SUCCESS STORY

# Reykjavik University

Reykjavik University creates ideal conditions for hybrid classes with TeamConnect Ceiling 2

“We knew that Sennheiser offers leading technology and that its portfolio is very corporate-oriented.”

Arnar Egilsson, IT support manager at RU

### Challenge

When the COVID-19 pandemic hit, Reykjavik University quickly needed to decide on a solid, reliable AV solution for remote learning. One important aspect of the deployment was to find a microphone solution that would work in compliance with the new hygiene protocols.

### Solution

As touchless microphone solution, TeamConnect Ceiling 2 was installed in nine classrooms of about 160 m2 which are laid out for about 60 students. The rooms are used for hybrid teaching and online conferences. The ceiling mic's priority zone is used to acoustically emphasize the teacher's area in the classrooms. Exclusion zones are used to ignore noise from projectors and ventilation.

### FACTSHEET

<b>Products installed</b>	9 units of TeamConnect Ceiling 2
<b>Country</b>	Iceland
<b>Region</b>	EMEA
<b>Industry</b>	University
<b>Partner</b>	Crestron Biamp
