Digital microphones solve frequency problems caused by LED lights

Challenge

The implementation of LED lighting caused difficulties in audio transmission of the microphones. Furthermore, the CBS had repeatedly range problems with the established microphone infrastructure.

Solution

In a first step, all small and middle-sized lecture rooms will be equipped with the SpeechLine Digital Wireless microphone system. By the year 2020 it is planned to have all auditoriums shifted to the digital transmission technology of Sennheiser.

“Handling is extremely easy, the products work perfectly. The transmission range is also excellent and the capacity of the integrated rechargeable batteries has so far been sufficient for every event.”

Jens H. H. Nielsen IT/AV Supporter

FACTSHEET

Products installed	33 SpeechLine Digital Wireless microphone systems
Country	Denmark
Region	EMEA
Industry	Business School
Integrator	Atea
Profile	Copenhagen Business School is by national and international standards a strong institution with a distinctive 'business university' profile.
