

CUSTOMER SUCCESS STORY

Hokuyaku Takeyama Holdings, Inc.

Transforming Conference Communication:
Hokuyaku Takeyama Adopts Touchless
Microphone System TCC 2 with TruVoicelift

Challenge

As a health care company, Hokutake is involved in medical and nursing care and was very nervous about the spread of COVID-19. Handing a microphone from person to person at meetings was one of the first challenges that they needed to address when the pandemic hit.

Solution

Integrator LandSkip came up with a state-of-the-art conference system that included the touchless microphone solution TeamConnect Ceiling 2 (TCC 2) that reduces hygiene risks and makes everyone be heard clearly, even in Hokutake's larger conference rooms thanks to TCC's TruVoicelift feature.

“With TCC 2, we don’t need to move closer to the microphone. And of course, there is no need to pass a handheld microphone. The whole process has become much easier.”

Kuninao Hie, Executive Managing Officer and General Manager of Corporate Planning Department
