

## CUSTOMER SUCCESS STORY

# X-Inc

## X-Inc future-proofs new office with Sennheiser's TeamConnect Ceiling 2

“I would like to say a big thank you to Sennheiser for producing such high-quality products and to EAS for ensuring that the installation process was smooth and fuss free.”

Neo Kwok Siang, Digitalisation Lead of X-Inc

### Challenge

In Dec 2019, X-Inc shifted to its brand-new headquarters XPACE – a food innovation facility with vertically integrated spaces for ideation, testing, manufacturing, and logistics. The culinary hub consists of a comprehensive suite of co-working spaces amongst other facilities and needed to be adequately equipped with the proper infrastructure to facilitate business meetings and discussions. With the increasing importance of teleconferencing, X-Inc started to look for partners that could improve the audio and conferencing capabilities of one of the larger boardrooms.

### Solution

X-Inc selected the TeamConnect Ceiling 2 (TCC2) microphone to capture audio effectively in the office boardroom. The ceiling microphone ensured that meeting participants present in the office could be heard clearly by other participants who were dialing in remotely.
