

## CUSTOMER SUCCESS STORY

# Jesus College / University of Oxford

### Profile

Located in the heart of Oxford, UK, Jesus College combines the highest standards of academic excellence in teaching and research with a vibrant, inclusive and supportive community. Amongst their Fellows, Lecturers and Tutors are many world-class academics working at the boundaries of interdisciplinary research in the digital age.

### Challenge

The Digital Hub, primarily a lecture theatre and conference space, hosts various events, including conferences and music performances, making superior sound quality paramount. The venue's unique cylindrical design posed significant reverberation issues, requiring extensive sound absorption solutions.

### Solution

Jesus College decided to choose Sennheiser due to their reputation for excellent sound quality, durability, and reliability, qualities crucial for the Digital Hub, a high-end venue prioritizing quality. The array of Sennheiser products already in use includes Speechline Digital Wireless handheld and lapel microphones with Multi Channel receivers, and TeamConnect Ceiling microphones. The use of ceiling microphones has transformed the space, mitigating reverberations and enhancing the sound experience.

### Fact Sheet

<b>Products Installed</b>	2 x TeamConnect Ceiling 2, 4 x channels SLDW
<b>Country</b>	UK
<b>Integrator</b>	Pure AV
<b>Partner Products</b>	Bi-Amp DSP
<b>Reason for Choosing</b>	Performance of TCC2's in this very challenging space
